

Health Camps

The Department of Psychiatry, DLNPGMC Ratlam, conducts regular outreach mental health camps at Hussain Tekri, Jaora, in collaboration with the Hussain Tekri Administration and District Administration. These monthly camps aim to provide psychiatric assessment, treatment, and follow-up care to individuals seeking faith-based healing for mental illnesses. Patients are evaluated by qualified mental health professionals and provided with appropriate psychotropic medications free of cost. The department emphasizes that while faith healing may offer spiritual support, evidence-based pharmacological treatment remains essential for effective recovery. Through counseling, medication distribution, and awareness activities, the program promotes comprehensive, accessible, and patient-centered mental healthcare.
