Date- 09/06/2018

Time – 09.30 am to 04.00 pm

Venue- District training center, Ratlam

Organized by- Ministry of Health and Family welfare, Central bureau of health intelligence and Government autonomous Medical college, Ratlam

This workshop was conducted in district training center, ratlam with the help of CBHI, Bhopal. Usually CBHI conducted half day orientation workshop for Medical College but this is the first time they conducted a full day workshop. In this workshop total 110 health care providers were participated. These participants includes Faculty of Medical College (Professor, Associate professor, Assistant professors, demonstrators, senior resident and junior resident), Medical officers and nurses of District hospital and members of Medical record department of district hospital Ratlam.

The honourable guest for this workshop was Dr. Ulka Shrivastava, director medical education department, government of Madhya Pradesh. The other guest present in the welcome ceremony of workshop was Dr. Sanjay Dixit, Dean Government Medical College Ratlam, Dr. Prabhakar Nanavare, CMHO District Ratlam, Dr. Deep Vyas, civil surgeon District hospital Ratlam, Dr. Tapadia Incharge training center, Mr. Shrimant Kumar, deputy director, CBHI, Bhopal, Dr. Atul Shrivastava, Dr. Shushma Shrivastava and Dr. Sanjib Das, Coordinator for this workshop.

The trainer of this workshop was Dr. Atul Shrivastava, Dr. Shushma Shrivastava and Dr. Dhruvendra Pandey. Dr. Ulka Shrivastava Director Medical Education and Dr. Sanjay Dixit, Dean Government Medical college Ratlam was observer for this workshop.

This workshop starts with Introduction to electronic Medical records and their importance, which was taken by Dr. Atul Shrivastava. By this lecture he enriched participants about new way of data collection and their legal importance. Their after he gave information about history of Family of classification and how this 10 revision of International classification of Disease came into existence. His lecture covered a brief details about first to eleven revision of ICD and various other supplementary editions. In this workshop Mr. Shrimant kumar also informed all the participants about various activities conducted by central bureau of health intelligence.

The next lecture was on overview of chapters of ICD-10 which was taken by Dr. Dhruvendra Pandey. He covered all the details of chapter, blocks, categories and sub categories noted on three different volume of ICD-10. He also taught about how easily these can be implement in their department with some workout.

International classification of disease includes various codes for different diseases. This covered very well by Dr. Atul Shrivastava in their next lecture on Basic coding guidelines and coding structures. Coding of disease needs various special characters and abbreviations. So without excersice this learning process was incomplete. Dr. Atul shrivastava and Dr. Shushma Shrivastava gave some excersice to all the participants and they have to code them with help of all the volume of ICD 10 book. This workshop

enriched with discussion at various points and also this showed participants interest and enthusiasm. Medical certification of cause of death is a important legal document and most of time it found to wrongly filled. Dr. Atul taught about correct way of filling this document and also covered various point where the medical practitioner committed mistake. At the end of this academic session various participants gave their feedback. Participants told that a it's a very good learning process and also because this college is in inception stage so implementation of ICD -10 is easy. The trainer for this workshop was very energetic and knowledgable. Some participants gave feedback that this kind of academic and learning activity should be happen at regular interval.

This workshop end with vote of thanks by Dr. Sanjib Das to honourable DME madam, CBHI, Bhopal, trainers and participants.
